

Merit System

- This system automate the whole procedure for generating merit for 11th science admission .So it is very usefull for higher secondary school for automation of 11th science student admission process.
- In this system you need to add students' information who have submitted the written form for taking admission .This contains information like name, cast, passing year, last school, percentage etc.
- After entering the data of all students who have submitted the form you can enters the marks of main subject by form no wise. And using this data merit will be generated.

- You can generate merit list of all category like open, OBC etc. by just clicking on generate merit list button. It will automatically calculate marks and accordingly process to generate merit list.

- After generating the merit list you can confirm or reject the student from it so the next merit list will be affected.

- You can also give the notification to the students by sending SMS for acknowledging that you are included in merit so please confirm your admission.

- This system is also generate some reports like general application list includes all students' details who have submitted the forms, general merit list contains all students those have satisfied the criteria, Confirm admission list includes those students who have confirmed their admission in school, reject admission list includes students who have rejected their admission.

- In sort you just need to click on generate merit list button then print it and put it on your notice board and your job is over.
